SUMMARY

Enthusiastic and dedicated self-learner with over a year of coding experience, driven by a thirst for knowledge and a relentless pursuit of excellence. Eager to embark on a career in the dynamic world of web development, with a strong desire to explore emerging technologies, particularly Artificial Intelligence (AI). Actively seeking opportunities to contribute my skills and knowledge to a forward-thinking company.

Key Strengths

- **Proficiency in Clean and Efficient Code:** Possess a deep commitment to writing code that is not only functional but also elegant, emphasizing readability and maintainability.
- **Automated Testing with Jest:** Proficient in creating basic automated functions using Jest, contributing to the development of robust and error-free applications.
- **Git and Collaborative Coding:** Experienced in utilizing Git for version control, fostering collaborative coding efforts and ensuring a seamless integration of changes.
- **Effective File Management:** Demonstrated ability to organize and manage files efficiently, promoting a well-structured and organized development process.
- **Deployment Expertise:** Competent in fundamental deployment procedures for web applications, with a strong commitment to mastering cloud technologies, particularly Amazon Web Services (AWS).
- **Eager Learner and Strong Work Ethic:** An enthusiastic and committed learner, dedicated to staying current with industry trends, and continuously striving to expand skillsets.

EDUCATION

United Academy (Kathmandu)

Jul, 2020 - May, 2022

I successfully completed my High School education, graduating with a Class 12 in 2022. This foundational education has provided me with a strong academic background and essential skills that I'm ready to apply in my future endeavors.

PROJECTS

WeatherMan:

Created 'WeatherMan,' a responsive web app showcasing frontend skills and API integration for real-time weather information using React.

ToDos:

Developed a full-stack Todo app using the MERN stack, featuring responsive design and engaging animations.

Nephara:

Designed and developed 'Nephara,' a full-stack e-commerce website with cloth customization powered by Fabric.js and Canvas. Utilized Next JS and Express JS for frontend and backend, integrated MySQL for data storage, and employed Redis for efficient caching.

Portfolio:

Portfolio, powered by Firebase Database, presents a streamlined showcase of my web development journey. The UI combines functionality with aesthetics, featuring animations and Dark/Light Modes for an engaging experience.

Talk-A-Tive:

MERN chat application with real-time messaging using Socket.IO, enabling users to create chat groups and engage in both individual and group conversations. The application includes robust search functionality and places a strong emphasis on a sleek and user-friendly UI/UX design. It offers secure user authentication, seamless real-time messaging, group creation, one-on-one chats, and efficient message search features.

Skills

HTML, CSS, Javascript, React, Next JS, Node js, Express js, My Sql, MongoDB, firebase, Redis, Fabric Js, JEST, Docker

Language

English, Nepali, Hindi
